Ukraine – A new market for Hexol® lubricants

The process to expand the presence of Hexol® lubricants on new markets reaches a new step with a new partnership.

IKS Group LLC is as of now a new Hexol® partner! Starting with May 2016, Hexol® products will be present on the Ukrainian market through the representation of IKS Group.

The momentum created in 2015 through growth of sales and expansion on new markets continues throughout 2016, coupled with new product launches and our new synthetic line "Synline". This has helped us achieved a step forward in helping the company develop further.

"In the first fiscal quarter (Q1) of 2016, we witnessed a YoY (year-over-year) growth of over 10% of our overall sales, when comparing with Q1 2015. On the Romanian market, Hexol managed to stay put and produce a similar performance as last year in Q1, however our export markets experienced a substantial growth from 2015, displaying a very solid YoY growth of almost 400%, driving the overall sales numbers of the company to rise. New collaborations in Ukraine and Macedonia opened up new markets for us, while taking on new partners in Hungary and Bulgaria helped us solidify our position on markets we were already present in." is what Hexol® company president, Daniel Condratov, declares.
