Hexol® growth continues throughout Q3 - 2016

When comparing Q3 of 2016 with the same time last year, the company has witnessed a year-over-year sales growth of 12%.

The continuous rise in sales volume has proven to be consistent this year, owing itself largely to a substantial growth in export sales. The volume of export sales has seen a growth of 100%, having effectively doubled from this same period last year.

National sales have also seen a small rise, maintaining its growth rate from last year.
The company's turnover has grown by 11% from 2015.

"Already by the 30th of November 2016, our total sales volume exceeded last year's final results, both as turnover, where we have exceeded 15,000,000 RON, and as total sales. We are inclined to believe that this year's results will drastically surpass those of last year." - declares Hexol® company president, Daniel Condratov.
